Over the course of performance car history, and specifically muscle car history, big-block engines are particularly beloved, and for

good reason. Not only are they the essence of what a muscle car is, but before modern technology and stroker engines, they were also the best way to make a lot of horsepower. All of the Detroit manufacturers

had their
versions of big-
block engines,
and Ford was no
exception.

Actually, Ford
was somewhat
unique in that
it had two very
different big-
block engine
designs during
the muscle car
era. The FE

Download Free 1971 Ford 390

more power to

also known as
the "Lima"
design, which
was more similar
to the canted-

While the
