many reasons, ranging from pesticide use to bad weather.

## **Garden Pests Whiteflies: Controlling Whiteflies In The Garden**

A Greenfly are one of the most common garden pests. They are found on all types of plants, and thrive outside or under cover. They feed by sucking sap through fine tubular mouthparts, which they insert into the plants' cells. Greenfly are part of the larger group known as aphids, which also includes blackfly, root aphids and woolly aphids.

## **Greenfly – Which? Gardening Helpdesk**

Aphids, blackfly, greenfly are probably the most widespread plant pest problem in the garden. They will attack a wide
