Describes one Honduran boy's difficult and dangerous journey to find his mother, who had made the trek northward to the United States in search of a better life when Enrique had been five years old, but who had never made enough money to return home for her children, in a poignant account that addresses the issues of family and the implications of illegal immigration. Reprint. 30,000 first printing.

Considered by many to be mentally retarded, a brilliant, impatient fifth-grader with cerebral palsy discovers a technological device that will allow her to speak for the first time.

From body art to baseball cards, comics to cathedrals, pie charts to power ballads . . . students need help navigating today's media-rich world. And educators need help teaching today's new media literacy. To be literate now means being able to read, write, listen, speak, view, and represent across all media—including both print and nonprint texts, such as film, TV, podcasts, websites, visual art, fashion, architecture, landscape, and music. This book offers secondary teachers in all content areas a flexible, interdisciplinary approach to integrate these literacies into their curriculum. Students form cooperative learning groups to evaluate media texts from various perspectives (artist, producer, sociologist, sound mixer, economist, poet, set designer, and more) and show their thinking using unique graphic organizers aligned to the Common Core State Standards

Schools remain notorious for co-opting digital technologies to «business as usual» approaches to teaching new literacies. DIY Media addresses this issue head-on, and describes expansive and creative practices of digital literacy that are increasingly influential and popular in contexts beyond the school, and whose educational potential is not yet being tapped to any significant degree in classrooms. This book is very much concerned with engaging students in do-it-yourself digitally mediated meaning-making practices. As such, it is organized around three broad areas of digital media: moving media, still media, and audio media. Specific DIY media practices addressed in the chapters include machinima, anime music videos, digital photography, podcasting, and music remixing. Each chapter opens with an overview of a specific DIY media practice, includes a practical how-to tutorial section, and closes with suggested applications for classroom settings. This collection will appeal not only to educators, but to anyone invested in better understanding - and perhaps participating in - the significant shift towards everyday people producing their own digital media.

Brings together stories, theories, and research that can further inform the ways in which writing teachers situate and address intellectual property issues in writing classrooms. The essays in the collection identify and describe a wide range of pedagogical strategies, consider theories, present research, explore approaches, and offer both cautionary tales and local and contextual successes.

Special edition slipcase edition of John Green's Paper Towns, with pop-up paper town. From the bestselling author of The Fault in our Stars. Quentin Jacobsen has always loved Margo Roth Spiegelman, for Margo (and her adventures) are the stuff of legend at their high school. So when she one day climbs through his window and summons him on an all-night road trip of revenge he cannot help but follow. But the next day Margo doesn't come to school and a week later she is still missing. Q soon learns that there are clues in her disappearance . . . and they are for him. But as he gets deeper into the mystery - culminating in another awesome road trip across America - he becomes less sure of who and what he is looking for. Masterfully written by John Green, this is a thoughtful, insightful and hilarious coming-of-age story.
