Gunpowder, also known as the retronym black powder to distinguish it from modern smokeless powder, is the earliest known chemical explosive. It consists of a mixture of sulfur (S), charcoal (C), and potassium nitrate (saltpeter, KNO₃). The sulfur and charcoal act as fuels while the saltpeter is an oxidizer.

Making Black Powder To mix the black powder ingredients together, open your ball mill (rock tumbler) and add the three ingredients and the lead balls. As the tumbler rotates, the balls will crush the chemicals together and grind them into a powder. The longer you let the tumbler run, the more finely ground the black powder will be.

How to Make Black Powder Safely – ThoughtCo

Black powder is made with just sulfur, potassium nitrate, and charcoal, however, in order to get useful powder, you need to follow the instructions. Just mixing the ingredients together won't blend them enough. By using the process above, the chemicals are blended much more evenly and the particles are closer together, resulting in a butter burn.

Using black powder cartridges There is no mystery or difficulty producing cartridges once you have the powder and a police licence to store it at home. You must be sensible - it's very flammable, so no smoking or ignition sources. It is also a laxative, due to the sulphur content - so don't lick your fingers!

Focus: Black Powder! - Warlord Games

Black Powder is a game for the militarily inclined gentlemen with straight backs, bristling beards and rheumy eyes that have seen a thing or two. If tales of battle and glory in days-gone-by stir nothing in your breast, if the roar of cannon does not quicken the pulse and set fire in the belly, then this is not the rule set for you.
