In this historic moment of transgender visibility in the U.S., writer, activist, and public health consultant Willy Wilkinson's *Born on the Edge of Race and Gender: A Voice for Cultural Competency* uses the power of storytelling to contextualize one of the most misunderstood social issues of our time. This poetic, journalistic memoir shines an intersectional beacon on the ambiguity and complexity of mixed heritage, transgender, and disability experience, and offers an intimate window into how current legislative and policy battles impact the lives of transgender people. Whether navigating the men's locker room like a "stealth trans Houdini," accessing lifesaving health care, or appreciating his son's recognition of him as a "transformer," Wilkinson compellingly illustrates the unique, difficult, and sometimes comical experiences of transgender life. A seasoned public health consultant and cultural competency trainer, Wilkinson provides practical tools and resources to help community health organizations, educational institutions, and businesses create LGBTQ- and trans-affirming systems. Innovative, moving, and accessible, this multifaceted memoir explores the liberation of finding one's voice in a world that prescribes silence, and offers a fresh look at ways to systemically affirm diversity throughout society.

Authors explore how queer identities are connected with specific places: places where people gather, socialize, protest, mourn, and celebrate. The focus is deeper look at how sexually variant and gender non-conforming Americans constructed identity, created communities, and fought to have rights recognized by the government. Each chapter is accompanied by prompts and activities that invite readers to think critically and immerse themselves in the subject matter while working collaboratively with others.

An unflinching and endearing memoir from LGBTQ+ advocate Jackson Bird about how, through a childhood of gender mishaps and an awkward adolescence, he finally sorted things out and came out as a transgender man in his mid-twenties. When Jackson Bird was twenty-five, he came out as a transgender to his friends, family, and anyone in the world with an internet connection. Assigned female at birth and raised as a girl, he often wondered if he should have been born a boy. Jackson didn't share this thought with anyone because he didn't think he could share it with anyone. Growing up in Texas in the 1990s, he had no transgender role models. He barely remembers meeting anyone who was openly gay, let alone being taught that transgender people existed outside of punchlines. In this “soulful and heartfelt coming-of-age story” (Jamia Wilson, director and publisher of the Feminist Press), Jackson chronicles the ups and downs of growing up gender confused. Illuminated by journal entries spanning childhood to adolescence to today, he candidly recalls the challenges and loneliness he endured as he came to terms with both his gender and his bisexual identity. With warmth and wit, Jackson also recounts how he navigated the many obstacles and quirks of his transition – like figuring out how to have a chest binder delivered to his NYU dorm room and having an emotional breakdown at a Harry Potter fan convention. From his first shot of testosterone to his eventual top surgery, Jackson lets you in on every part of his journey—taking the time to explain trans terminology and little-known facts about gender and identity along the way. “A compassionate, tender-hearted, and accessible book for anyone who might need a hand to hold as they walk through their own transition or the transition of a loved one” (Austin Chant, author of *Peter Darling*), *Sorted* demonstrates the power and beauty in being yourself, even when you're not sure who “yourself” is.

This is the kind of writing I hope members of allied health and medical disciplines have been waiting for. *Complicities* offers a gentle, generous, highly knowledgeable, and accessible introduction to and application of transdisciplinarity at its best. Using arguments and ideas from the critical humanities and cutting-edge approaches to neurobiology and psychotherapy, Natasha Distiller invites the reader into a world in which diversity and complexity are openly at play and the taken-for-granted is given a chance to dissolve. David Azul, La Trobe University, Bendigo, Australia Beginning from the premise that we cannot separate ourselves from the systems that precede and formulate us as subjects, the author argues that, in reckoning with this complicity, a model of subjectivity can be created that moves beyond binaries and identity politics. In doing so, the book examines how we might develop a more socially just psychological theory and practice, which is both systems work and intra-psychological work. In bringing together ways of thinking developed in the humanities with clinical psychotherapeutic practice, this book offers one interdisciplinary take on key questions of social and emotional efficacy in action-oriented psychotherapy work. Natasha Distiller is a psychotherapist in private practice in Berkeley, California. She is a lecturer in the Gender and Womens Studies Department at UC Berkeley and a Beatrice Bain Research Scholar in the department.

Transgender studies, broadly defined, has become increasingly prominent as a field of study over the past several decades, particularly in the last ten years. The experiences and rights of trans people have also increasingly become the subject of news coverage, such as the ability of trans people to access restrooms, their participation in the military, the issuing of driver's licenses that allow a third gender option, the growing visibility of nonbinary trans teens, the denial of gender-affirming health care to trans youth, and the media's misgendering of trans actors. With more and more trans people being open about their gender identities, doctors, nurses, psychologists, social workers, counselors, educators, higher education administrators, student affairs personnel, and others are increasingly working with trans individuals who are out. But many professionals have little formal training or awareness of the life experiences and needs of the trans population. This can seriously interfere with open communications between trans people and service providers and can

negatively impact trans people's health outcomes and well-being, as well as interfere with their educational and career success and advancement. Having an authoritative, academic resource like The SAGE Encyclopedia of Trans Studies can go a long way toward correcting misconceptions and providing information that is otherwise not readily available. This encyclopedia, featuring more than 300 well-researched articles, takes an interdisciplinary and intersectional approach to trans studies. Entries address a wide range of topics, from broad concepts (e.g., the criminal justice system, activism, mental health), to specific subjects (e.g., the trans pride flag, the Informed Consent Model, voice therapy), to key historical figures, events, and organizations (e.g., Lili Elbe, the Stonewall Riots, Black Lives Matter). Entries focus on diverse lives, identities, and contexts, including the experiences of trans people in different racial, religious, and sexual communities in the United States and the variety of ways that gender is expressed in other countries. Among the fields of studies covered are psychology, sociology, history, family studies, K-12 and higher education, law/political science, medicine, economics, literature, popular culture, the media, and sports.

Debunks the twenty-one most common myths and misperceptions about transgender issues From Laverne Cox and Caitlyn Jenner to Thomas Beatie (“ the pregnant man ”) and transgender youth, coverage of trans lives has been exploding—yet so much misinformation persists. Bringing together the medical, social, psychological, and political aspects of being trans in the United States today, “ You ’ re in the Wrong Bathroom! ” : And 20 Other Myths About Transgender and Gender-Nonconforming People unpacks the twenty-one most common myths and misconceptions about transgender and gender-nonconforming people. Authors Laura Erickson-Schroth, MD, a psychiatrist, and Laura A. Jacobs, LCSW-R, a psychotherapist, address a range of fallacies: Trans People Are “ Trapped in the Wrong Body ” You ’ re Not Really Trans If You Haven ’ t Had “ the Surgery ” Trans People Are a Danger to Others, Especially Children Trans People Are Mentally Ill and Therapy Can Change Them Trans People and Feminists Don ’ t Get Along

Addresses the experiences of trans college students, faculty, and staff in a single volume for the first time. While more trans students, faculty, and staff have come out on US college campuses today than ever before, many still report enduring harassment and discrimination. Others avoid disclosing their gender identity because they do not feel safe or comfortable at their schools. This groundbreaking book is the first to address their experiences in a single volume. Genny Beemyn brings together personal narratives and original research to give readers both individual and large-scale perspectives, which provide unprecedented insight into the experiences of trans people in higher education. These contributions reveal that despite an improving environment, trans people continue to face widespread interpersonal and institutional opposition on campuses across the country. Some of the first published research focusing on nonbinary trans undergraduates and trans graduate students is included here, in addition to the most comprehensive research to date of trans students at women's colleges and of trans academics. Trans People in Higher Education also examines the sexual health of trans students, the treatment of trans people by individuals with institutional authority, and the strategies and lessons learned from one college that successfully became more trans inclusive.

“ Weaving personal narratives and research studies together in ways that highlight the full diversity of trans individuals, Trans People in Higher Education serves as an urgent call to action for higher education to play a leadership role in catalyzing broad social change around trans rights. In the process, Beemyn offers an invaluable resource for creating a trans-welcoming and trans-supportive environment on college and university campuses. ” — Lynn Pasquerella, President, Association of American Colleges and Universities PRAISE FOR TRANS PEOPLE IN HIGHER EDUCATION “ Beemyn's advocacy and research on trans people in higher education is groundbreaking, and this edited volume is no exception. Through a mix of narratives and personal accounts, as well as the findings of research studies by major scholars in the field, the book paints a rich portrait of the variety of trans identities and experiences on college campuses today, along with recommendations for how campuses can create a more inclusive environment. The volume is an extraordinary resource

for all who are committed to creating campus communities that are welcoming and affirming for trans students, faculty, and staff, and for those who simply want to learn more about the experiences of trans people on college campuses today. ” — Kristin G. Esterberg, President, State University of New York at Potsdam “ For more than two decades, Genny Beemyn has been at the forefront of higher education research and policy advocacy regarding trans issues. Beemyn has given us yet another stellar contribution to those fields with this new anthology, which showcases an impressive cohort of emerging voices as well as a burgeoning body of high-quality scholarship. It ’ s the best, most comprehensive overview to date on the timely topics it addresses. ” — Susan Stryker, author of *Transgender History, Revised Edition: The Roots of Today ’ s Revolution* “ *Trans People in Higher Education* combines the powerful accessibility of compelling personal stories with the complex and often harsh findings of qualitative and quantitative research to demonstrate the continued need for trans-affirming campuses, from policy to classroom engagement. Despite more than two decades of positive changes in academic institutions, trans and nonbinary students, faculty, and staff continue to struggle for acceptance and equal access. This timely book shows that, in challenging the constricts of the binary gender system, helping others develop skills for culturally competent interactions, and expanding campus-wide policies, these individuals offer academia the best gift of all: learning opportunities and the inspiration to do better. ” — Willy Wilkinson, author of *Born on the Edge of Race and Gender: A Voice for Cultural Competency*
