Libicki et al. argue that information collection requirements and systems for counterinsurgency are important because the community that conducts counterinsurgency crosses national and institutional boundaries and because the indigenous population plays a large role in determining the outcome of an insurgency.

Because insurgency and counterinsurgency involve a battle for the allegiance of a population between a government and an armed opposition movement, the key to exploiting information power is to connect with and learn from the population itself,

All such information can improve counterinsurgency operations by making U.S. forces and agencies far better informed than they are at present. The authors argue that today's military and

Utilizing the proposed ways of gathering information from the

Let's begin with the basics: violence is an inherent part of policing. The police

represent the most direct means by which the state imposes its will on the citizenry. They are armed, trained, and authorized to use force. Like the possibility of arrest, the threat of violence is implicit in every police encounter. Violence, as well as the law, is what they represent.
