Includes FREE eBook version suitable for use on any table or iPad, or any smartphone! Practice the CAAT with over 400 practice questions including: Reading Comprehension, Number Operations and Vocabulary

One of the most important public policy issues in the United States is how to improve the life prospects of disadvantaged youth who, in their formative years, face low-quality school systems, poor access to health care, and high-crime environments. *The Problems of Disadvantaged Youth* includes a broad range of research examining various aspects of disadvantage, and ways of increasing the ability of low-income youths to improve their circumstances later in life. Taking an empirical economics perspective, the nine essays in this volume assess the causal impacts of disadvantage on youth outcomes, and how policy interventions can alleviate those impacts. Each chapter develops a framework to describe the relationship between youths and later life outcomes, addressing such factors as educational opportunity, health, neighborhood crime rates, and employment. This vital book documents the serious short- and long-term negative consequences of childhood disadvantage and provides nuanced evidence of the impact of public policy designed to help needy children.

This books is a great resource for students who are planning to appear for the CogAT test for getting into Grade 7 or Grade 8. This book also includes useful tips for preparing for the CogAT test. Tips are available for each section that will help test takers deal with complex strategies associated with each section. Concern with stress and coping has a long history in biomedical, psychological and sociological research. The inadequacy of simplistic models linking stressful life events and adverse physical and psychological outcomes was pointed out in the early 1980s in a series of seminal papers and books. The issues and theoretical models discussed in this work shaped much of the subsequent research on this topic and are reflected in the papers in this volume. The shift has been away from identifying associations between risks and outcomes to a focus on factors and processes that contribute to diversity in response to risks. Based on the Family Research Consortium's fifth summer institute, this volume focuses on stress and adaptability in families and family members. The papers explore not only how a variety of stresses influence family functioning but also how family process moderates and mediates the contribution of individual and environmental risk and protective factors to personal adjustment. They reveal the complexity of current theoretical models, research strategies and analytic approaches to the study of risk, resiliency and vulnerability along with the central role risk, family process and adaptability play in both normal development and childhood psychopathology.
