Approach your cat quietly and slowly, avoiding sudden movements. The best way of lifting an injured cat is to put one hand under the chin on the front of the chest, and the other behind the hindlegs. If the cat seems frightened and potentially aggressive, it is better to lift the cat in a thick towel, but be careful as cats can bite through towels. If you are dealing with an unknown cat, you may be able to encourage the animal into a shed or garage before seeking help.

First, apply direct pressure to the wound using a wad of gauze, tissue, or clean cloth as a compress. If nothing else is available, your bare hand or finger will have to do. Apply pressure to the wound for a full 10 minutes (or as long as your cat will allow). Do not lift the gauze to check for if the bleeding stopped.
