~~Common Engine Problems With Mercruiser Engines~~
Common Engine Problems With Mercruiser Mercruiser engines, used in marine inboard and inboard/outboard motors, are very reliable. Still, as with all things mechanical, problems great and small can occur. Mechanics know an engine needs three things to run; those being fuel, air and spark.

~~Common Engine Problems With Mercruiser Engines~~
the most common problems mercruiser engines have - Maxum ... I am having problems with my inboard outboard mercruiser engine. When I attempt accelerate up to cruising speed/rpms while in the water, the rpms flatline at or around 1500 to 2000 and will not go above that speed. I also experience vibration when I try to get the rpms up to cruising ...

Download Ebook Common Engine Problems With Mercruiser Engines Hi, I have problems with a Mercruiser 3.0 4-cyl, 5 years old. On idle, it runs like only on 3 cyl. Have changed spark plugs, wires, and manifold (frozen in the winter) plus tested compression and looked at the spark, fine. It seems like it is the last cyl, removing the plug wire ...

~~Common Engine Problems With Mercruiser Engines~~
Remove the arrestor on top of the carburetor and examine the carburetor. If the carburetor is cracked or damaged, replace it. Move the Mercruiser Alpha One throttle cable forward and back while you examine the carburetor. If gasoline streams fluidly, the problem does not lie in the fuel system.

Air vent in fuel cap not open. Faulty emergency kill switch. Some engines -- not the pull-start kind -- have a battery that starts it. If your engine has a battery, make sure it is charged up before use; verify the battery connections are clean -- as corroded connections can keep a Mercury outboard from starting.

~~Mercruiser 4.3 Problems~~
Mercruiser or someone else) figured out that the 180 degrees was wrong. Since it has a 160 degree thermostat, mercruiser says it should not go above 160 degrees, no matter what! Apparently starting sometime in 1995, Mercruiser Alpha 1's began having a problem. Now I've heard 2 stories (Well 3, if you count the "There's nothing wrong").

Re: Common 5.0 L Mercruiser? Alpha I Problem? I can't help as to common issues but I will say that that is a very common motor and there are very few choices as far as boat motors (I/O's) are concerned. They (mercruiser) have been using the same basic set ups for 30 years or so. it goes something like this...

~~Common 5.0 L Mercruiser? Alpha I Problem? | Boating Forum~~ ~~Valve and tappet noise~~ usually begins as a clicking sound, or chatter, at half engine speed and may then disappear at high speeds. The cause is often excessive valve clearance or a defective hydraulic valve lifter. To check your clearances, you can insert a thickness gauge between the valve stem and the rocker arm or lifter.

~~Sounds Like Trouble: A Quick Guide to Diagnosing Common~~ ~~General Motors Vortec line of V-6 engines~~ commonly suffer from problems with excessive oil consumption and engine knocking. Knocking problems are particularly prevalent in Vortec engines used in trucks and SUVs built during the late 1990s and early 2000s.
