I have six of these (DESA Specialty Products 5316-A) motion sensors, half on one circuit and half on another. One circuit works fine but the three on the other circuit have exactly the problem described by Jack. It seems unlikely that the three on one circuit would go bad while the ones on the other circuit remain working.

Vols. for 1970-71 includes manufacturers' catalogs.

This book presents an overview of seventeen forms of inquiry used in curriculum research in education. Conventional disciplinary forms of inquiry, such as philosophical, historical, and scientific, are described, as well as more recently acknowledged forms such as ethnographic, aesthetic, narrative, phenomenological, and hermeneutic. Interdisciplinary forms such as theoretical, normative, critical, deliberative, and action research are also included. These forms of inquiry are distinguished from one another in terms of purposes, types of research questions addressed, and the processes and logic of procedure employed in arriving at knowledge claims.

More than twenty years in the making, Country Music Records documents all country music recording sessions from 1921 through 1942. With primary research based on files and session logs from record companies, interviews with surviving musicians, as well as the 200,000 recordings archived at the Country Music Hall of Fame and Museum's Frist Library and Archives, this notable work is the first compendium to accurately report the key details behind all the recording sessions of country music during the pre-World War II era. This discography documents--in alphabetical order by artist--every commercial country music recording, including unreleased sides, and indicates, as completely as possible, the musicians playing at every session, as well as instrumentation. This massive undertaking encompasses 2,500 artists, 5,000 session musicians, and 10,000 songs. Summary histories of each key record company are also provided, along with a bibliography. The discography includes indexes to all song titles and musicians listed.

"The main objective of developing the UN/DESA Compendium of Innovative E-government Practices as an ongoing project is to create a venue for promoting innovative e-government solutions, services and products developed and yet to be developed by governments. The Compendium also enables South- South and North-South information-sharing of their respective experiences and innovative practices. In both cases, the focus is on hastening innovation and creating public value for the citizenry."--Provided by publisher.
