Water lilies belong to the angiosperm order Nymphaeales. Amborellales, Nymphaeales and Austrobaileyales together form the so-called ANA-grade of angiosperms, which are extant representatives of lineages that diverged the earliest from the lineage leading to the extant mesangiosperms 1-3. Here we report the 409-megabase genome sequence of the blue-petal water lily (*Nymphaea colorata*).

Birmingham has seen 1400 years of growth, during which time it has evolved from a small 7th century Anglo Saxon hamlet on the edge of the Forest of Arden at the fringe of early Mercia to become a major city. A combination of immigration, innovation and civic pride helped to bring about major social and economic reforms and to create the Industrial Revolution, inspiring the growth of similar ...

Intervention program assists families with children under the age of three who have delays in any developmental area or a diagnosed condition.

Families of these infants and toddlers are given information and support to help the child develop and adapt to the fullest extent possible. To accomplish this EI can provide a developmental evaluation where each child ' s needs and abilities are assessed.
