According to Outsourcing and Technological Innovations: A Firm-Level Analysis, a March 2008 working paper: "As the pace of innovations in production technology increases, the firm has less time to amortize the sunk costs associated with purchasing the new technologies. This makes producing in-house with the latest technologies relatively more expensive than outsourcing."

The Impact of Technological Innovation on Outsourcing ...

In fact, analysts expect global Information Technology (IT) outsourcing to have a compound annual growth rate of close to six percent through 2019. Some studies show as much as 60 percent of the IT function being outsourced, with spending on outsourcing accounting for 10.2 percent of average IT budgets.
