Decide which file system to use

Novell Documentation: NetWare 6 - Server Operating System ...
The original NetWare product in 1983 supported clients running both CP/M and MS-DOS, ran over a proprietary star network topology and was based on a Novell-built file server using the Motorola 68000 processor, but the company soon moved away from building its own hardware, and NetWare became hardware-independent, running on any suitable Intel-based IBM PC compatible system, and a wide range of network cards. From the beginning NetWare implemented a number of features inspired by mainframe and mi
