Historical Gis: Technologies, Methodologies, And ...
A historical geographic information system is a geographic information system that may display, store and analyze data of past geographies and track changes in time. It can be regarded as a subfield of historical geography and geographic information science. GIS was originally developed for use in environmental sciences, military and for computer assisted cartography. It is the opinion of some that the tools developed for these uses are ill-suited for the features of historical data.

Historical geographic information system - Wikipedia
Stanford Libraries' official online search tool for books, media, journals, databases, government documents and more.

A place in history: a guide to using GIS in historical research by Ian N. Gregory

History & GIS - Geographic Information Systems/Science ...
Since archaeology looks at the unfolding of historical events through geography, time and culture, the results of archaeological studies are rich in spatial information. GIS is adept at processing these large volumes of data, especially that which is geographically referenced. It is a cost-effective, accurate and fast tool.
