The world's greatest mental mathematical magician takes us on a spellbinding journey through the wonders of numbers (and more) "Arthur Benjamin . . . joyfully shows you how to make nature's numbers dance." -- Bill Nye (the science guy) The Magic of Math is the math book you wish you had in school. Using a delightful assortment of examples-from ice-cream scoops and poker hands to measuring mountains and making magic squares-this book revels in key mathematical fields including arithmetic, algebra, geometry, and calculus, plus Fibonacci numbers, infinity, and, of course, mathematical magic tricks. Known throughout the world as the "mathemagician," Arthur Benjamin mixes mathematics and magic to make the subject fun, attractive, and easy to understand for math fan and math-phobic alike. "A positively joyful exploration of mathematics." -- Publishers Weekly, starred review "Each [trick] is more dazzling than the last." -- Physics World

When classmate and frequent tormentor Bobby Blair makes fun of Mathildas incorrect answer to their teachers question of how many quarter cups are in a cup, Mathilda despises her nickname even more. Why did her dad give her such an awful nickname? Poor Mathilda has unfortunately been called Math since she was a baby. Unfortunate, because mathematics is Maths worst subject in and out of school. Math shares her feelings about Bobby Blairs teasing with her BFF Maddox, who is a math whiz. The girls are together so often, most people refer to them as one unit, MathnMaddox. Maddox has a knack for helping Math understand puzzling math concepts by breaking them down using everyday language and relating them to real-world experiences. This interactive book for elementary aged readers tells how Maddox, with the help of soccer practice, lunch items, and a school magic show, assists Math with grasping the fractional concept of a quarter. When all is said and done, Math feels so confident in her ability to determine a quarter of a whole or a set, she feels like a true mathematician. Or as Maddox jokes, a mathemagician. An added bonus parent/teacher page provides learning activity ideas to both encourage and enhance student learning.
