Viviane, a beautiful Celtic princess, unwittingly unravels the spell that binds the spirit of the evil Idoc within a circle of tall stones. Once released, the sorcerer-priest uses his powers to deliver vengeance upon those responsible for his original enslavement - including the Princess Viviane. With Idoc in possession of the body of Prince Caradawc, her betrothed, Viviane can no longer judge safely between friend and foe, between this life and previous incarnations. Yet to rescue Caradawc from his nightmare, she must risk everything to reach the dreaded dark tower where Idoc waits. And, to ensure victory over evil, she must seek out Lucifer's Emerald. She journeys through dreams and nightmare, beauty and horror, good and evil to save her lover and destroy the sorcerer-priest. This is a quest for spiritual grace which is beautifully depicted and includes all the timeless ingredients of legend.

As thrilling as any novel, as taut and exciting as any adventure story, Peter Hathaway Capstick's Death in the Long Grass takes us deep into the heart of darkness to view Africa through the eyes of one of the most renowned professional hunters. Few men can say they have known Africa as Capstick has known it-leading safaris through lion country; tracking man-eating leopards along tangled jungle paths; running for cover as fear-maddened elephants stampede in all directions. And of the few who have known this dangerous way of life, fewer still can recount their adventures with the flair of this former professional hunter-turned-writer. Based on Capstick's own experiences and the personal accounts of his colleagues, Death in the Long Grass portrays the great killers of the African bush-not only the lion, leopard, and elephant, but the primitive rhino and the crocodile waiting for its unsuspecting prey, the titanic hippo and the Cape buffalo charging like an express train out of control. Capstick was a born raconteur whose colorful descriptions and eye for exciting, authentic detail bring us face to face with some of the most ferocious killers in the world-underrated killers like the surprisingly brave and cunning hyena, silent killers such as the lightning-fast black mamba snake, collective killers like the wild dog. Readers can lean back in a chair, sip a tall, iced drink, and revel in the kinds of hunting stories Hemingway and Ruark used to hear in hotel bars from Nairobi to Johannesburg, as veteran hunters would tell of what they heard beyond the campfire and saw through the sights of an express rifle.

The Most Comprehensive Gunsmithing Guide of All Time. Written by one of the most prolific firearms experts of all time, The Complete Guide to Gunsmithing is a highly detailed and essential reference for the gun enthusiast and gunsmith alike. At nearly 500 pages, Chapel covers everything from the use of proper tools to how to get a gunsmithing job, and everything in between. In more than forty chapters of exceptionally clear prose, the book answers every question a collector, soldier, or home defender could have on topics such as: • Drawings and Blueprints • Stock Design • Checkering and Carving • Stock Repairs and Alterations • Etching and Engraving • And many more Not only is the book an incredible resource for gun owners and gunsmiths, it's also a wonderful look at the world of firearms in the first half the twentieth century. Published just over seventy years ago, the

book--and revised by the author two decades later--The Complete Guide to Gunsmithing is fascinating look at how the nature of firearms has changed. With a thoughtful introductory note by renowned outdoorsman Dr. Jim Casada and eighty-five meticulous illustrations, this is the definitive edition of an enduring and authoritative classic. Skyhorse Publishing is proud to publish a broad range of books for hunters and firearms enthusiasts. We publish books about shotguns, rifles, handguns, target shooting, gun collecting, self-defense, archery, ammunition, knives, gunsmithing, gun repair, and wilderness survival. We publish books on deer hunting, big game hunting, small game hunting, wing shooting, turkey hunting, deer stands, duck blinds, bowhunting, wing shooting, hunting dogs, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

The long-awaited revision of Fundamentals of Applied Probability and Random Processes expands on the central components that made the first edition a classic. The title is based on the premise that engineers use probability as a modeling tool, and that probability can be applied to the solution of engineering problems. Engineers and students studying probability and random processes also need to analyze data, and thus need some knowledge of statistics. This book is designed to provide students with a thorough grounding in probability and stochastic processes, demonstrate their applicability to real-world problems, and introduce the basics of statistics. The book's clear writing style and homework problems make it ideal for the classroom or for self-study. Demonstrates concepts with more than 100 illustrations, including 2 dozen new drawings Expands readers' understanding of disruptive statistics in a new chapter (chapter 8) Provides new chapter on Introduction to Random Processes with 14 new illustrations and tables explaining key concepts. Includes two chapters devoted to the two branches of statistics, namely descriptive statistics (chapter 8) and inferential (or inductive) statistics (chapter 9).

Non-Chemical Weed Control is the first book to present an overview of plant crop protection against non-food plants using non-chemical means. Plants growing wild--particularly unwanted plants found in cultivated ground to the exclusion of the desired crop--have been treated with herbicides and chemical treatments in the past. As concern over environmental, food and consumer safety increases, research has turned to alternatives, including the use of cover crops, thermal treatments and biotechnology to reduce and eliminate unwanted plants. This book provides insight into existing and emerging alternative crop protection methods and includes lessons learned from past methodologies. As crop production resources decline while consumer concerns over safety increase, the effective control of weeds is imperative to insure the maximum possible levels of soil, sunlight and nutrients reach the crop plants. Allows reader to identify the most appropriate solution based on their individual use or case Provides researchers, students and growers with current concepts regarding the use of modern, environment-friendly weed control techniques Presents methods of weed management--an important part of integrated weed management in the future Exploits the knowledge gained from past sustainable weed management efforts

Once you're familiar with Will Malloff's method of chainsaw lumbermaking, you'll be simply and economically turning trees into lumber on your own Learn how to select the tree you want, fell it safely, and saw it into a fine pile of building or cabinet lumber. With detailed instructions and over 400 photographs, Will Malloff tells you everything you need to know to turn a chainsaw into a lumbermill, including how to: Modify the chainsaw and make numerous accessories for milling Use the equipment in the woods Grind a smooth-cutting ripping chain Build your own mill from a 2 x 4 and scraps of plywood Cut burls, shape ovals and mill natural knees for boatbuilding Malloff's method is the fruit of over 30 years' experience of felling trees and making lumber. He's logged everything from giant redwoods to desert mesquite and fulfilled his youthful ambition to fell timber in every major forest of North America. Drawing on this experience, he has invented several chainsaw mills, and perfected the easy, efficient method of chainsaw lumbermaking that he describes in this book. If you've ever had trouble finding the lumber you need, or wanted to build something with your own trees, "Chainsaw Lumbermaking" is the book you've been waiting for. Will Malloff has built a variety of mills and is the designer of what many consider the most effective chainsaw lumbermaking system available. Malloff has spent nearly half a century researching and developing tools and wood technology that minimize ecological impact. In an endeavor to build his own blacksmith shop on a Canadian Pacific island, he invented a state-of-the-art ripping chain, which made chainsaw lumbermaking more feasible and economical than ever before.
