As today ' s spark-ignition and diesel engines have to fulfill constantly increasing demands with regard to CO2 reduction, emissions, weight and lifetime, detailed knowledge of the components of an internal combustion engine is absolutely essential. Automotive engineers can no longer survive without such expertise, regardless of whether they are involved in design, development, testing or maintenance. This text book provides answers to questions relating to the design, production and machining of cylinder components in a comprehensive technical analysis.

Fuels, Lubricants, Coolants, and Filters easily helps a reader to understand these wonderful liquids and filters better. By starting with the basics, it builds your knowledge step-by-step in a very structured manner.

"He rocked my foundation! Greg Baer touched me deeply. He's got the answer to finding happiness in life."—Tony Trupiano, Talk America Why do most of us search our entire lives for loving and happy relationships but rarely find them? What is the "secret something" that all relationships need in order to thrive? Dr. Greg Baer found the answers to these questions while working with thousands of individuals and couples. In Real Love, he shares his enlightening and practical blueprint for creating successful relationships and reveals the secret to finding and keeping what he calls "Real Love." In Real Love, you'll discover: - The difference between Imitation Love and Real Love - How to eliminate conflicts with spouses, children, parents, friends and colleagues - How to put an end to destructive " Getting " and " Protecting " behaviors - How Real Love can eliminate anger, resentment, and fear - The four steps to finding Real Love With Real Love as your guide you can begin to heal the wounds of your past and create rewarding and fulfilling relationships in every area of your life.

While millions of Ford rear-wheel-drive cars are equipped with the durable and simple C4 and C6 transmissions of the 1960s, early in the 1980s Ford replaced those old designs with the AOD transmission for a new generation of cars. Overdrive gears, once popular before WWII, were now becoming popular again, as manufacturers were under increasing pressure to raise fuel economy to meet ever more demanding EPA standards. A nice byproduct of that was more comfortable cruising speeds, where your engine didn't have to work so hard in addition to getting better fuel economy. In Ford AOD Transmissions: Rebuilding and Modifying the AOD, AODE and 4R70W, author George Reid walks you through the process step-by-step, from removing the transmission from the vehicle, to complete disassembly and cleaning, to careful reassembly, to proper re-installation and road testing. Performance modifications are also covered, as well as an ID guide for various model numbers, evolutionary design changes, shift kit installation, and torque converter selection. This book is ideal for people who already have one of these transmissions in their car, as well as enthusiasts who would like to swap one of these more modern units into an older chassis to get all the benefits of overdrive. If you plan on researching or working on any one of these overdrive models, this book is a vital addition to your workbench or library.

This is a straightforward text on RISC assembly language programming for MIPS computers - the microprocessor gaining popularity due to its compact and elegant instruction set. Enabling students to understand the internal working of a computer, courses in RISC are an increasingly popular option in assembly language programming.

Trans(n)fusion is a highly original book that tries to radicalize our ways of ' critical thinking ' across disciplines. The book, refreshingly, brings into play critical philosophy, literary criticism, studies in mathematics, physics, chemistry and developmental biology, and various other disciplines and epistemes to set up a tenure and tenor of ' critical thinking ' . The book is an exclusive intervention in how thinking across traditions and systems of thought can generate distinct interpretive experiences. In questions, in a unique transcultural and transversal bind, our ways of hermeneutic and literary-cultural thinking. Trans(n)fusion resets the dialectics between text and theory.
