Project MUSE - Kinesics and Context

A product of systematic social interaction, the kinesic system is a social system. Out of the range of muscular adjustments produced by a human being, some are utilized by the social system for communicational purposes. Thus, to say it simply, no human body produces a kine (least kinesic unit); it moves or adjusts in a set of muscular relationships. In social interaction, certain of these have demonstrable special utility in the communicational process.
