The social sciences have been heavily influenced by modernization theory, focusing on issues of economic growth, political development and social

change, in order to develop a predictive model of linear progress for developing countries following a Western prototype. Under this hegemonic paradigm of development the world tends to get divided into

simplistic binary
oppositions between the
'West' and the 'rest', 'us'
and 'them' and 'self' and

the discussion on what
constitutes the 'Other' as

the ideas, institutions and socio-political practices of India and China, and in how far they shape the social scientist's understanding of their discipline in general. It provides a counter-narrative by revealing the

relativity of geographies, and by showing that the conventional presentation of core elements of the Asian socio-political set-up as 'aberrations' from the Western models fails to acknowledge their inherent

strategic character of adapting Western concepts to meet local requirements.

Drawing on multiple disciplines, concepts and contexts in India and China, the book makes a valuable contribution to the theory

This book explores the phenomenon of Independence Days. These rituals had complex meanings both in the

these seminal celebrations. The focus is therefore very much on political culture in a broad sense, and changing perceptions and presentations over time. Highlights of the book include an overview by David

There are detailed and
