Medical Terminology of the Respiratory System - Nursecepts

Pronunciation of Terminology What is the Respiratory System? The respiratory system is an integrated arrangement of organs and structures which functions to extract oxygen from the atmosphere into the bloodstream and expel carbon dioxide, a waste product of metabolism, from the bloodstream into the atmosphere. It consists of the respiratory tract, the muscles used for breathing and the part of the brain that controls breathing.

Medical Terminology- Respiratory System Anatomy

respiratory system The organs involved in the interchange of gases between an organism and the atmosphere. In humans, this system consists of the air passageways and organs (nasal cavities, pharynx, larynx, trachea, and lungs, including bronchi, bronchioles, alveolar ducts, and alveoli) and the respiratory muscles.
