spinal stenosis. This technique involves making a small incision above your spine and placing a metal device, known as a spacer, between 2 vertebrae, so that they can't move onto the underlying nerve.

Lumbar decompression surgery - How it's performed - NHS

The most common kinds of spine surgery for synovial cysts can be either a decompression alone or a decompression with a spine fusion. Microdecompression Spine Surgery If there is no associated instability with the cyst (e.g. no degenerative spondylolisthesis as seen on flexion/extension x-rays), then a microdecompression of the nerve root with removal of the cyst is reasonable.

Spine Surgery for Synovial Cysts

Lumbar decompression surgery is a type of surgery used to treat compressed nerves in the lower (lumbar) spine. It's only recommended when non-surgical treatments haven't helped. The surgery aims to improve symptoms such as persistent pain and numbness in the legs caused by pressure on the nerves in the spine.

Lumbar decompression surgery - NHS
