Demand And Supply Notebook Guide Answer Key
• Identify which curve—demand or supply—is affected by the information. • Determine whether the curve shifts, and if so, whether it shifts to the left or to the right. • Draw and label a graph with a demand or supply curve for the related product, and show whether the curve shifts to the left or to the right. Below the

Notebook Guide Demand and Supply
Demand and supply curves are simply graphs of demand and supply schedules. Equilibrium occurs where the supply and demand curves intersect at an equilibrium price of \$3 and an equilibrium quantity bought and sold of 8. Excess supply or excess demand at any price is simply the horizontal distance between the supply and demand curves.

Lecture 5 Notes

NOTEBOOK GUIDE CHAPTER Markets, Equilibrium, and Prices 6
price, supply and demand. The supply and demand curves which are used in most economics textbooks show the dependence of supply and demand on price, but do not provide adequate information on how equilibrium is reached, or the time scale involved. Classical economics has been unable to simplify the explanation of the dynamics involved.
