injuries to the tibial shaft, plateau and pilon, as well as deformities, nonunions and bone loss. Each chapter is a case that opens with a unique clinical presentation, followed by a description of the diagnosis, assessment and management techniques used to treat it, as well as the case outcome and clinical pearls. Cases included illustrate different management strategies for Schatzker (I-VI) tibial plateau fractures, plates and screws for proximal tibia fracture, intramedullary nailing for midshaft and distal tibial fracture, and the use of Ex-Fix with open tibia and distal pilon fracture, in addition

musculoskeletal trauma. In light of these developments, the successful first edition of this book has been revised and updated including new information to the original chapter on CAOS (computer-aided orthopedic surgery) and an additional chapter on osteoporosis. A chapter on hip fracture rehabilitation has also become necessary. This updated book provides an excellent resource in trauma for orthopedic residents around the world.

substantial revision of the "Agricultural Waste Management" book that discusses the implications and possible management systems for crop production. This 14-chapter text also provides the basic information needed to understand the concern on pollution from agricultural wastes. Agricultural wastes are defined as the excesses and residues from the growing and first processing of raw agricultural products, such as fruits, vegetables, meat, poultry, fish, and dairy products. The introductory chapters deal with the influence of legal constraints and changing agricultural practices on the

environmental problems associated with agricultural production. The following chapter focuses on the characteristics of food processing wastes and animal wastes. The remaining chapters are devoted to the fundamentals, principles, and benefits of various waste management processes and treatment systems, including biological and biochemical processes, ponds and lagoons, oxygen transfer, aerobic, anaerobic, physical and chemical treatments, nitrogen control, and land disposal. This book is of great value to food agricultural producers, scientists, and engineers who are interested
