Emotional intelligence is an important trait for success at work. IQ tests are biased against minorities. Every child is gifted. Preschool makes children smarter. Western understandings of intelligence are inappropriate for other cultures. These are some of the statements about intelligence that are common in the media and in popular culture. But none of them are true. In the Know is a tour of the most common incorrect beliefs about intelligence and IQ. Written in a fantastically engaging way, each chapter is dedicated to correcting a misconception and explains the real science behind intelligence. Controversies related to IQ will wither away in the face of the facts, leaving readers with a clear understanding about the truth of intelligence.

strategies to prevent firefighter behavioral health issues using the proactive approach of resilience training. Further, resilience training aims to develop mental toughness and support overall well-being in all facets of the responder's life. This book emphasizes lessons and research from Positive Psychology. A new branch in the science of how the mind operates, Positive Psychology focuses on developing emotional wellness and preventing behavioral health problems. It does so in part by teaching habits and skills that promote self-efficacy, social support, and realistic optimistic thinking. The program outlined in this book supplements current approaches addressing emotional and behavioral health problems that afflict the emergency response community. Such problems include PTSD, anxiety, burnout,

alcoholism, depression, and suicide. The authors present interventions and measures for resilience training backed by research and demonstrated results within education, the military, and other communities. Drawing on her more than 25 years' experience in working with fire service representatives at all levels, Ms. Deppa understands the importance of considering the fire service culture. Dr. Saltzberg, a practicing psychologist, has taught resilience skills to a wide range of populations, including students, teachers, counselors, and U.S. Army officers. Together, they present a compelling approach to preventing behavioral health problems before they occur.
