Riverine litter items were deposited to both sides of the river mouths on coastal beaches, and their abundance generally declined with distance from the river mouth. However, maximum litter accumulations were often found on beaches north of the river mouth, suggesting a long-term influence of the prevailing equatorward low-level jet along the Chilean coast.

A river flowing in its channel is a source of energy which acts on the river channel to change its shape and form. In 1757, the German hydrologist Albert Brahms empirically observed that the submerged weight of objects that may be carried away by a river is proportional to the sixth power of the river flow speed.

In 1995, this novel won both the Jomo Kenyatta Literature Prize, and the Commonwealth Writers Prize Best First Book in the Africa Region. Now reprinted, it remains in great demand. An epic story spanning cultures, it tells the lives of three generations of women. It traces the story of Akoko in her rich traditional Luo setting, through to the children who live and die in the 20th century.

African Americans and Latinos earn lower grades and drop out of college more often than whites or Asians. Yet thirty years after deliberate minority recruitment efforts began, we still don't know why. In *The Shape of the River*, William Bowen and Derek Bok documented the benefits of affirmative action for minority students, their communities, and the nation at large. But they also found that too many failed to achieve academic success. In *The Source of the River*, Douglas Massey and his colleagues investigate the roots of minority underperformance in selective colleges and universities. They explain how such factors as neighborhood, family, peer group, and early schooling influence the academic performance of students from differing racial and ethnic origins and differing social classes. Drawing on a major new source of data--the National Longitudinal Survey of Freshmen--the authors undertake a comprehensive analysis of the diverse pathways by which whites, African Americans, Latinos, and Asians enter American higher education. Theirs is the first study to document the different characteristics that students bring to campus and to trace out the influence of these differences on later academic performance. They show that black and Latino students do not enter college disadvantaged by a lack of self-esteem. In fact, overconfidence is more common than low self-confidence among some minority students. Despite this, minority students are adversely affected by racist stereotypes of intellectual inferiority. Although academic preparation is the strongest predictor of college performance, shortfalls in academic preparation are themselves largely a matter of socioeconomic disadvantage and racial segregation. Presenting important new findings, *The Source of the River* documents the ongoing power of race to shape the life chances of America's young people, even among the most talented and able.

Winner of the Labriola Center American Indian National Book Award 2017 Mohawk midwife Katsi Cook lives in Akwesasne, an indigenous community in upstate New York that is downwind and downstream from three Superfund sites. For years she witnessed elevated rates of miscarriages, birth defects, and cancer in her town, ultimately drawing connections between environmental contamination and these maladies. When she brought her findings to environmental health researchers, Cook sparked the United States' first large-scale community-based participatory research project. In *The River Is in*

Us, author Elizabeth Hoover takes us deep into this remarkable community that has partnered with scientists and developed grassroots programs to fight the contamination of its lands and reclaim its health and culture. Through in-depth research into archives, newspapers, and public meetings, as well as numerous interviews with community members and scientists, Hoover shows the exact efforts taken by Akwesasne's massive research project and the grassroots efforts to preserve the Native culture and lands. She also documents how contaminants have altered tribal life, including changes to the Mohawk fishing culture and the rise of diabetes in Akwesasne. Featuring community members such as farmers, health-care providers, area leaders, and environmental specialists, while rigorously evaluating the efficacy of tribal efforts to preserve its culture and protect its health, *The River Is in Us* offers important lessons for improving environmental health research and health care, plus detailed insights into the struggles and methods of indigenous groups. This moving, uplifting book is an essential read for anyone interested in Native Americans, social justice, and the pollutants contaminating our food, water, and bodies.

The visionary author's masterpiece pulls us along with her Black female hero through time to face the horrors of slavery and explore the impacts of racism, sexism, and white supremacy then and now. Dana, a modern black woman, is celebrating her twenty-sixth birthday with her new husband when she is snatched abruptly from her home in California and transported to the antebellum South. Rufus, the white son of a plantation owner, is drowning, and Dana has been summoned to save him. Dana is drawn back repeatedly through time to the slave quarters, and each time the stay grows longer, more arduous, and more dangerous until it is uncertain whether or not Dana's life will end, long before it has a chance to begin.

In this history of the black peasants of Amazonia, Oscar de la Torre focuses on the experience of African-descended people navigating the transition from slavery to freedom. He draws on social and environmental history to connect them intimately to the natural landscape and to Indigenous peoples. Relying on this world as a repository for traditions, discourses, and strategies that they retrieved especially in moments of conflict, Afro-Brazilians fought for autonomous communities and developed a vibrant ethnic identity that supported their struggles over labor, land, and citizenship. Prior to abolition, enslaved and escaped blacks found in the tropical forest a source for tools, weapons, and trade—but it was also a cultural storehouse within which they shaped their stories and records of confrontations with slaveowners and state authorities. After abolition, the black peasants' knowledge of local environments continued to be key to their aspirations, allowing them to maintain relationships with powerful patrons and to participate in the protest cycle that led Getulio Vargas to the presidency of Brazil in 1930. In commonly referring to themselves by such names as "sons of the river," black Amazonians melded their agro-ecological traditions with their emergent identity as political stakeholders.

In the "brilliant novel" (*The New York Times*) V.S. Naipaul takes us deeply into the life of one man — an Indian who, uprooted by the bloody tides of Third World history, has come to live in an isolated town at the bend of a great river in a newly independent African nation. Naipaul gives us the most convincing and disturbing vision yet of what happens in a place caught between the dangerously alluring modern world and its own tenacious past and traditions.

The sequel to *The River and the Source*, which won the Jomo Kenyatta Prize for Literature, and the Commonwealth Writers' Prize for the Best First Book, Africa Region in 1995. In this novel, Ogola tells of the lives of AIDS' orphans Lisa, Johnny and Alicia, and how they are guided to adulthood by their aunt Wandia, an intellectual and independent woman. The author weaves her narrative around the aspirations of her characters and how they develop to find a place in Luo/Kenyan society. A place they seek at the dawn of the twenty-first century, when Kenya is emerging from decades of corruption and deterioration; and in an environment of contradiction and mixed messages, where values and attitudes are continuously being re-examined.
