Management : Foundations and Applications, 1st Asia - Pacific edition is a more concise version of the popular text Management, 4th Asia - Pacific edition, which is also published by Wiley. The 15 chapters of this edition cover key topics typically taught in a 12- or 13- week teaching semester. Joining the author team and enhancing this edition's critical analysis of management theory and applications are the best-selling authors from another of the Wiley's undergraduate introductory management texts - Management: Core Concepts and Applications, 2nd Australasian edition (Davidson et al.). This text has a strong emphasis on the importance of the Asian region to contemporary Australian and New Zealand organisations, both during the crisis and in its aftermath. Of course, Management: Foundations and Applications, 1st Asia- Pacific edition also retains the features that make its larger 'parent' text so popular with students and lecturers: A balanced coverage of small to medium-sized enterprises and larger multinational corporations an emphasis on the need for business activities to be sustainable in the terms of preserving the welfare of future generations the Career Readiness Workbook at the end of the book, which includes a range of individual and group activities to encourage the practical application of management theory. With its clear insights into the dynamics of management in the workplace of today and future, Management: Foundations and Applications, 1st Asia - Pacific edition provides a sound basis for the contemporary undergraduate study of introductory management.

The second edition of this text has been thoroughly updated, continuing its strong emphasis on the importance of the Asian region to contemporary Australian and New Zealand organisations. Many Asian case examples are featured to illustrate key management concepts, and these provide a useful basis for comparison with management practices in Australia and New Zealand. Numerous practical examples throughout the text highlight contemporary management issues, such as: workplace diversity sustainability ethics/corporate social responsibility the impact of technology innovation in the workplace globalisation employee engagement flexible working arrangements work – life balance generational issues in the workplace skills shortages in various industries the importance of effective employee recruitment and training organisational culture workforce flexibility and casualisation the 24/7 nature of contemporary communication technology, including social media outsourcing Management, Foundation and Applications, 2nd Asia – Pacific edition, has also retained the features that made its previous edition so popular with students and lecturers, including the Career Readiness Workbook activities at the end of the book, and the accompanying Interactive Study Guide with its vast array of multimedia resources.
