The volume will include selected and reviewed papers from CONAT - International Congress of Automotive and Transport Engineering to be held in Brasov, Romania, in October 2016. Authors are experts from research, industry and universities coming from 14 countries worldwide. The papers are covering the latest developments in automotive vehicles and environment, advanced transport systems and road traffic, heavy and special vehicles, new materials, manufacturing technologies and logistics, accident research and analysis and innovative solutions for automotive vehicles. The conference will be organized by SIAR (Society of Automotive Engineers from Romania) in cooperation with FISITA.

Questo manuale di riparazione, è la rivista che illustra e spiega l'impianto elettrico e la gestione elettronica degli impianti della vettura. E' completo di misurazioni elettriche di valori di resistenze delle utenze, oscillogrammi dei segnali degli attuatori elettrici Specifica l'ubicazione dei vari componenti principali della gestione elettronica di tutti gli impianti e ne descrive il principio di funzionamento. Sono inoltre indicati tutti i pin-out delle principali centraline e descrive dettagliatamente le scatole portafusibili e relè delle vetture

In the wake of the profound upheavals that our society has been facing, the business world is undergoing change. Values ??such as trust, well-being, sustainability, and respect for human beings and their deeper ambitions are becoming increasingly important. Corporations and professionals can achieve and maintain success only if they can bring their relationship with their customers to a new, higher level. The condition that links the two is very similar to that created when we fall in love. The organizational models and marketing approaches based on the metaphor of war, and the inherent rhetoric of "command and control", are no longer valid; to form such a bond we need love. The authors are aware of this. Since 2013, in collaboration with international scholars, they have been studying the new market dynamics and the fundamental role of ethics in gaining commercial results. While their previous book Sales Ethics (2015) helped to set up and manage customer relationships based on trust and fairness, this new book will support you in building your business strategy and designing marketing tools (from customer analysis, to the definition of your offer and the style of communication, up to the positioning of prices and the management of resources) in the light of a new model, the Loving Business Model, which aims to make the customer fall in love with you, and you with your work. This book, like its predecessor, is the result of independent research conducted between Italy and the United States combined with the authors' many years of professional experience. It contains the most up-to-date and effective techniques available in the modern marketing landscape, supported by case studies, concrete examples and activities, which will guide you to put your newly acquired knowledge into practice.
