Alternatively, smaller steel channel can be placed at the
bottom of the beam, and supported by posts, to
increase the strength of an existing beam during a
remodel. It could also be placed on top of the beam as a
cap, to provide extra strength during the construction
of a home. #6 Vehicle Frames

8 Ways That Steel Channel is Often Used - Texas Iron
and Metal

Galvanized Steel Beams, is a A36 hot rolled, mild steel
beam that has been hot dipped in a zinc rich galvanizing
process. Galvanized beams are a lower cost alternative
to stainless steel to achieve rust free protection for up
to 30 years, while maintaining comparable strength
with a durable hard surface coating. Metals Depot
