Ancient Mesopotamians were no different! In fact, magic and sorcery were a very normal part of their everyday lives. They believed the world was often threatened by a host of demons-the supernatural kind-and sorcerers-the human kind. Note: sorcerers-or more accurately, sorceresses brought bad magic.

Mesopotamian Medicine and Magic. Studies in Honour of Markham J. Geller offers 34 brand-new text editions and analytical studies concerned with diverse healing traditions and practices in Ancient Western Asia.

The Sumerians, the pragmatic and gifted people who preceded the Semites in the land first known as Sumer and later as Babylonia, created what was probably the first high civilization in the history of man, spanning the fifth to the second millenniums B.C. This book is an unparalleled compendium of what is known about them. Professor Kramer communicates his enthusiasm for his subject as he outlines the history of the Sumerian civilization and describes their cities, religion, literature, education, scientific achievements, social structure, and psychology. Finally, he considers the legacy of Sumer to the ancient and modern world. "There are few scholars in the world qualified to write such a book, and certainly Kramer is one of them. . . . One of the most valuable features of this book is the quantity of texts and fragments which are published for the first time in a form available to the general reader. For the layman the book provides a readable and up-to-date introduction to a most fascinating culture. For the specialist it presents a synthesis with which he may not agree but from which he will nonetheless derive stimulation."—American Journal of Archaeology "An uncontested authority on the civilization of Sumer, Professor Kramer writes with grace and urbanity."—Library Journal

The Sumerian World explores the archaeology, history and art of southern Mesopotamia and its relationships with its neighbours from c.3,000 - 2,000BC. Including material hitherto unpublished from recent excavations, the articles are organised thematically using evidence from archaeology, texts and the natural sciences. This broad treatment will also make the volume of interest to students looking for comparative data in allied subjects such as ancient literature and

early religions. Mesopotamian Commentaries on the Diagnostic Handbook Sa-gig includes a cuneiform edition, English translation, and notes on medical lexicography for thirty Sa-gig commentary tablets and fragments, and represents a companion volume to *Knowledge and Rhetoric in Medical Commentary* (Brill, 2019).

Robert Hetzron first organized the North American Conference on Afroasiatic Linguistics (NACAL) at the University of California, Santa Barbara in 1973 and passed away only six months after it had completed a quarter century of annual meetings. He would undoubtedly have been pleased to know that NACAL is still going strong, and that ten years after his passing it attracted no fewer than thirty-six scholars from the United States, Canada, and eight other countries, who presented on topics near and dear to his heart such as phonology, morphology, syntax, language contact, classification, subgrouping, and the history of scholarship, in languages such as Amharic, Arabic, Aramaic, Egyptian, Hebrew, Omotic, and others, as well as the groups to which they pertain. Since he established it, NACAL has served a unique role among the meetings of learned societies in North America. Only a handful of organizations worldwide hold annual meetings dedicated to Afroasiatic linguistics, and NACAL is one of a very small number of venues where linguists from all sub-disciplines and schools of thought meet to share their research. NACAL is also an academic nexus, a unique node at which graduate students at the beginning of their careers rub shoulders with the native speakers of the languages which they study and with the titans of their fields, men and women of an almost legendary stature such as Hetzron himself. This volume contains sixteen contributions from these scholars, on a broad cross-section of topics within the field of Afroasiatic linguistics.

This work reviews the social and technological developments in Mesopotamia from 3800 to 2000 BC.

After more than fifty years since the last publication, the cuneiform texts relating to the treatment of the loss of male sexual desire and vigor in Mesopotamia are collected in this volume. The aim of the book is to present Mesopotamian medical tradition regarding the so-called n^š libbi therapies. šà-zi-ga in Sumerian, n^š libbi in Akkadian, lit. "raising of the 'heart'", is the expression used to indicate a group of texts intended to recover the male sexual desire. This medical tradition is preserved from the Middle Babylonian period to the Achaemenid one. This broad range testifies to the importance of the transmission of this material throughout Mesopotamian history. The

book provides the edition of this textual corpus and analyzes it in the light of new knowledge on ancient Near Eastern medicine. Moreover, this volume aims to show how theories and methodologies of Cultural Anthropology, Ethnopsychiatry and Gender Studies are useful for understanding the Mesopotamian medical system. This edition is an important tool for understanding Mesopotamian medical knowledge for Assyriologist, however since the texts have been translated and discussed using the anthropological and gender perspectives they are accessible also to scholars of other research fields, such as History of Medicine, Sexuality and Gender.

This volume is about the history, literature, ritual, and thought associated with ancient Mesopotamian witchcraft. With chapters on the changing forms and roles of witchcraft beliefs, the ritual function, form, and development of the Maqlû text (the most important ancient work on the subject), and the meaning of the Maqlû ceremony, as well as the ideology of the final version of the text. The volume significantly contributes to our understanding of the Maqlû text, and the reconstruction of the development of thought about witchcraft and magic in Mesopotamia.

Sources of Evil is a collection of thirteen essays on the knowledge employed by Mesopotamian healing experts to help patients who were suffering from misfortunes caused by divine anger, transgressions of taboos, demons, witches, or other sources of evil.
