We will look at Bigfoot folklore around the globe, dig into the history of the cryptid megafauna, review some very intriguing evidence of Bigfoot and accounts, and hypothesize why Bigfoot went into hiding. Ten years ago I went on a hunting trip in northern Washington State with my cousin Jason. I am far from an outdoors-man but I still jumped on the opportunity for a long weekend getaway with my crazy cousin. Had I know what I know today I am not sure if I would have gone, but what is certain is that my life forever changed that

weekend. After getting separated from my cousin the first evening I found myself lost in the vast wilderness, scared, and alone - at least I thought I was alone. Unbeknownst to me I was being hunted in the woods by a Bigfoot. I am not sure how long he was stalking me but I know I was lucky to get away with my life. For years after that weekend I was a different man. I was constantly in fear and scared to go anywhere outside of my home city in Austin, Texas. To help cope with the psychological trauma I found myself immersed in research studying Bigfoot, the Yeti,

this series for those who are dealing with the aftermath of a Bigfoot encounter and need validation that they are not crazy, or perhaps they simply want someone to relate to. I am also writing this book as a therapeutic outlet as well as a way to reach people regarding the realities of Bigfoot. Bigfoot is real, I know that beyond a shadow of a doubt, and I am far from crazy!

The oldest recorded account of Bigfoot dates all the way back to 986 AD by famous Viking explorer Leif Ericson and his men. Upon their first landing in the New

World the Norsemen wrote about manlike beasts that towered over the Vikings. These beasts were distinctly different than the natives they encountered. They wrote that these beasts were "horribly ugly, hairy, swarthy, and with great black eyes." The Vikings called these ape-like bipedal beasts Skellring. The Skellring lived in the woods, had a foul smelling odor, and a deafening shriek. Leif had many encounters with the Skellring before departing from the island. Bryan Sykes, a professor of human genetics at Oxford University who recently

embarked on a project to DNA test any or all available evidence for the existence of Bigfoot, said belief in Bigfoot-like beasts is a very consistent feature across cultures - "so much so that I have found indigenous people not even bothering to question their existence as they are so much a part of everyday life." The following book is the accumulation of years of research following my encounter. At the time I was looking for others who had experiences similar to mine. It was the only form of therapy I could find that eased my anxiety. I refused to go to the town's only

therapist. In a small town like this everyone would have known and it would have served as cause for a black mark on my family. After years of researching Bigfoot, the Yeti, and Sasquatch I have collected hundreds of accounts. Some I believe to be true and some I believe to be false claims of people looking for their names in print or their face on a TV screen. This book is the accounts I believe are most certainly true.

It was a frigid cold night on the icy and rugged slopes of the Ural Mountains when nine experienced hikers died. Their case is one which is shrouded in mystery; it is known as the Dyatlov Pass Incident. The events that conspired the evening of February 2, 1959, will forever be unknown, but what we do know for sure is that the hikers cut their way out of the safety and

warmth of their tents in the middle of the night. They ran down to the snow and ice covered woods wearing nothing more than their undergarments. They were never seen alive again. When the hikers failed to return from their trip search parties were sent out. They found the hikers spread throughout the forest nearly naked, barefoot, and dead. Four of the nine hikers had internal injuries and one of them, Ludmila Dubinina, had significant damage to her eye as well as her tongue ripped out. On a piece of newspaper left behind in the tent the hikers had scribbled these words: "From

now on we know that the snowmen exist. "Why would nine experienced hikers leave in such haste that they cut their way out of their tent. What were they running from? What threat is so terrifying that it could lead a rational person to run into an ice and snow covered terrain without shoes wearing nothing but undergarments? They had clothes in their tents specifically designed to keep them warm and safe from hypothermia in those exact environmental conditions. What scared them so much? Skeptics would have you believe the culprit is anything but the Yeti. How

could they otherwise, they have excluded the possibility because they refuse to lend any credibility to its existence, which is fair enough. However, I have seen the Yeti's cousin in Washington State, and it was not a pleasant encounter. I know that the cryptid megafauna primate Bigfoot exists. He is as real as you and I and he is dangerous. What happened that evening will always be disputed. But there is no doubt that their story is not unique. People have been mysteriously disappearing in the wilderness for over a century and most likely long

Bigfoot thriller you didn't

capture a tale too  
harrowing—and too earth-

Max Brooks brings Kate's extraordinary account to light for the first time, faithfully reproducing her words alongside his own extensive investigations into the massacre and the legendary beasts behind it.

Kate's is a tale of unexpected strength and resilience, of humanity's defiance in the face of a terrible predator's gaze, and, inevitably, of savagery and death. Yet it is also far more than that. Because if what Kate Holland saw in those days is real, then we must accept the impossible. We must accept that the creature known as Bigfoot walks among us—and that it

A missing child draws Deputy Daniel Clark into a bizarre investigation that leaves him questioning what he just witnessed. Trained to trust his instincts and to pay close attention to detail, his rational brain is at war with what he has seen.

Something very strange is happening in rural Sloan County, Missouri. Nothing in his experience has prepared him for anything like this. More disappearances only make the mystery deepen as the Sheriff tries to cover up what's really going on. Clark enlists the aid of other deputies who, like

monster, have seen things that don't make sense. Things that aren't real. Or are they? A creature from our primordial nightmares has found its hunting grounds in the rural Ozarks, along the shores of Table Rock Lake.

The closer they get to finding the creature, the more pressure they get to stay out of the investigation. Pressure from the sheriff and mysterious F.B.I. Agents who know more than they will admit. Soon, Clark learns that the creature he's been hunting has been hunting him as well. The ultimate battle of man versus beast is about to take place in the Ozarks.
