This book consists of both What is Life and Mind and Matter. In What is Life, Schrödinger attempts to provide a new understanding of living organisms by using thermodynamics as a backdrop. Life seems so organized. If it were subject to the second law of thermodynamics, we would expect that molecules would decay to lower energy states.

Mindfulness is a technique you can learn which involves making a special effort to notice what's happening in the present moment (in your mind, body and surroundings) – without judging anything. It has roots in Buddhism and meditation, but you don't have to be spiritual, or have any particular beliefs, to try it. It aims to help you: become more self-aware.

The *Life of the Mind* was the final work of Hannah Arendt, and was unfinished at the time of her death. Designed to be in three parts, only the first two had been completed and the first page of the third part was in her typewriter the evening of the day she suddenly died. The unfinished work was edited by her friend, the author, Mary McCarthy and published in two volumes in 1977 and 1978.

Brought together with these two classics are Schrödinger's autobiographical sketches, which offer a fascinating account of his life as a background to his scientific writings.

*What is Life? by Erwin Schrodinger*

The mind is the individual, subjective experiencing of “something” that is always changing, moment to moment. The concept of “mind” is elusive, and different languages conceptualize it differently. The Buddhist term for mind in Sanskrit is chitta, and has a wide range of meaning. It includes sense perception, verbal and abstract thought, emotions, feelings of happiness and unhappiness, attention, concentration, intelligence and more.
