YFM660F Grizzly 660 (2002-2008)

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

This slim book is designed to be a concise instructional manual on how to properly code the most common cases one sees daily on the obstetrics ("ob") floor as a Clinical Documentation Improvement (CDI) specialist. There is no "fluff" here. I know you are a busy professional and I wanted to give you the most important information so you don't waste your time. Follow the methodology outlined here and you will maximize the SOI, Weight, and Revenue of the cases you code. Note however that this book is not for the seasoned CDI specialist already familiar with coding the ob floor; you probably already know most of the information presented here. Also, this book is not meant as a reference manual on ob coding; it is a guide for the CDI Specialist, not the Coder.
